Comments

This is in regards to the update of 42 CFR Part 84. There is a strong desire in the Firefighting community to have the option to purchase SCI Cylinders as a replacement for our SCBA Units. SCI offers many advantages including personalized cylinders for easy identification and Dura Lite which is needed for training due to the fact that many training facilities are constructed of concrete and the ordinary cylinders are subject to above average wear and tear.

Every Fire Chief I see (and I see a lot) tell me the same thing. They will buy SCI if NIOSH approves it.

Thank you,

Paul W. Looney
